

Portable Magnifiers

MagniLink S Premium 2

The MagniLink S Premium 2 is a lightweight, easy-to-use magnifier. With a magnification range of 1.1x – 70x, the device features various high-contrast options as well as excellent brightness and sharpness. The high quality full HD camera provides excellent picture quality, with a light sensitive camera that offers flicker-free images.

The MagniLink S Premium 2 can be set up to be ready to use in seconds. It can easily be connected to a computer via HDMI or USB, making it easy to carry between different locations. The foldable legs minimize the device's footprint, and makes it possible to place the unit tightly alongside the left or the right of your laptop. Additionally, no power supply is needed as the unit is powered by the computer.

Software for computer connection is included with the MagniLink S Premium 2. When opting for the optional OCR software, printed text can be read aloud. The OCR processed text can be displayed in several different display modes such as line by line, word by word and character by character. You can also paste text straight into the program to have it read aloud.
